

INSPECTION REPORT.

on the* S T A T E

Dispensary at S A V N O O R .

in charge of 2nd. Grade Sub-Assistant Surgeon V. R. Kadle,

QUESTIONS.	ANSWERS.
I. (a) Date of inspection ...	5th. December 1916.
(b) Date of previous inspection.	25th. November 1915.
II. BUILDINGS.	
(a) Is the Dispensary public property or temporarily rented ?	State Property.
(b) Has it been specially built for out-door relief, or has it accommodation for in-door patients? If the latter, state the nature and express your opinion as to the sufficiency of the ward accommodation.	For both. Two Male and two female beds. This is sufficient.
(c) Is the Dispensary conveniently situated ?	Yes.
(d) Is the mortuary conveniently situated? Is it properly built, and is it well lit, furnished and arranged ?	Yes, well lit and arranged. It has a tank and sink and cupboard.
(e) Does the Dispensary and its arrangements fulfil the requirements laid down in the rules ?	Yes.
(f) Are women and children separated from males in the outpatients' department? Are there separate dressing rooms for them and separate windows from which to receive medicines ?	Women on the back verandah. Men on the front verandah. Seperate windows.

* State name, and whether Government, Endowed, Municipal or Local Fund, as the case may be.

QUESTIONS.	ANSWERS.
(g) Do the annual repairs appear to be properly done? When were they last completed, and what sum was expended?	This year 123 rupees have been spent, and and there is still some small repairs to the roof to be done.
(h) As regards the Dispensary generally, are you satisfied that it is kept in good order?	It is not clean enough. Cupboards, windows and servants clothing are dirty.
(i) Have you any recommendations to make for improving the Dispensary building or its present arrangements?	No.
) What recommendations as regards repairs, alterations, and fittings have been made recently? Have these recommendations been specially brought to the notice of the responsible authorities? What action, if any, has been taken by such authorities, and, where no action has been taken, what reasons have been given for non-compliance?	Last year I suggested an improvement to the roof, to prevent tiles blowing off, and an addition to the Sub-Assistant Surgeon's quarters. They have not yet been done. His Highness the Nawab has seen what was recommended.
III. EQUIPMENT.	
(a) Are the surgical instruments sufficient or otherwise? Are they in a good state of repair and clean? Name any that are not so. Are the surgical dressings carefully stored so as to protect them from dust and other impurities?	Sufficient. Well kept and clean. Yes.
(b) Are the medicines sufficient? If not, why not?	Yes.
(c) Are there any old and useless medicines or instruments in stock?	None.
(d) Are the Surgeon-General's orders as regards the storage of poisons strictly adhered to?	Yes.
(e) Are the stores in good order and neatly arranged?	Yes. But there is dust in many places.
(f) Have you any remarks to make on the condition or sufficiency of the bedding and furniture of the Dispensary?	Sufficient for the few patients.

QUESTIONS.

ANSWERS.

IV. RECORDS.

(a) Have the medical, *post-mortem* and other records been correctly and neatly kept and written up to date?

Yes.

(b) As regards the *post-mortem* records:—Do the examinations appear to have been properly and systematically conducted and do the opinions given appear to be well founded and properly expressed?

Yes. Eight *post-mortems* have been made this year.

Yes.

(c) Do all reports and returns appear to have been sent in within a reasonable time after they are due?

Yes.

(d) Are extracts from the Official Visitors' book regularly forwarded to the responsible officers?

Yes.

(e) Have all obsolete books and records been disposed of?

Yes.

(f) What has been the income of the Dispensary during the previous 12 months (1) from Hospital Fees, (2) from Compounding Fees, and (3) from the sale of drugs and condemned articles of equipment? Have you any remarks to make under this head?

(1) Rs. 8 - 9 - 0

(2) " 29 - 0 - 0

(3) " 24 - 11 - 6 (boxes, bottles, tins.

V. ADMINISTRATION.

(a) How are the sick attended to at night?

Mostly by their own friends.

There is no special night nursery arrangement.

(b) Where in-patient accommodation exists, are the diets suitable and economically provided?

Yes.

VI. ESTABLISHMENT.

(a) Do you think the Dispensary establishment efficient and sufficient?

Compounder has been here 23 years.

Dresser and old and not clean man.

Peon quite a boy.

QUESTIONS.	ANSWERS.
(b) What changes, if any, have been sanctioned in the Dispensary establishment since last inspection?	Nurse Sitabai left in June 1916, and is now at Belgaum Civil Hospital.
(c) Is the Dispensary or the Hospital Assistant in charge provided with reasonably good text-books on the main branches of the medical profession?	Yes, he has Rose and Carless Surgery, Osler's Medicine and Jelllett's Midwifery.
(d) State your opinion of the professional efficiency and general good conduct of the Dispensary Medical Officer.	I believe he does a good deal of work, I see many patients about. His conduct is good, but he has been slack about the general cleanliness of the building.
VII. THE TOWN AND ITS PEOPLE.	
(a) Is the Town Municipal? What is the number of its population?	Yes, 9368.
(b) Is the Medical Officer a member of the Municipality, where such exists? If not, is there any other medical man on the Municipal Board?	Yes.
(c) How often did the Dispensary Committee visit during the preceding 12 months?	Twice.
(d) Is the Dispensary Medical Officer often called upon to give assistance to parturient women? Do women apply for relief in diseases peculiar to themselves? Have they opportunities of obtaining female medical advice in the town or its neighbourhood?	Not often, two cases last year, none this year. Not often. No qualified man in the town.
(e) What epidemics have visited the town or district lately? Mention their cause, if known. Is there any endemic disease?	Plague about 500 hundred cases in the last 6 months.
(f) What are the prevailing diseases of the locality? Mention the chief causes of the annual death rate.	Malarial fevers, round worms, eye diseases, cough and skin diseases. Malaria is the chief disease and death cause.

QUESTIONS.	ANSWERS.
(g) What is the result of your enquiry as to the water-supply? Are the wells so situated as to allow of soakage from surrounding dwellings, &c.?	The well water in the dispensary is good for drinking water, and there are many good wells in the town. There are good tanks also. Water is abundant and good.
(h) State your opinion of the method of conservancy and disposal of refuse of the immediate surroundings of the Dispensary	It is carried to a ditch used by the Municipal sweepers and there buried. It is the only possible plan.

Vaccination No 609 of 1916
Huzur office, Saran
Date 3rd Nov. 1916

Memo.

The statement of Vaccinator has not yet been submitted to this office as required, though the Diwan has been ordered to submit it, as the number of persons vaccinated during every week is decreasing though this office has commented several times upon the work of the Vaccinator.

2) The Diwan should kindly see that all the orders of the Huzur are promptly obeyed & that they are not simply filed or reports thereon delayed in his office.

3) The next vaccination diary should be submitted to this office along with the Vaccinator's statement.

4) The Diwan should himself find out, in future, whether the work of the Vaccinator or measurer is properly done

Savanur 7 Feb: 1917

Meharban Lt: Nabab Sahab

Dilerjung Bahadur

Sir,

Savanur

With ref: to your order
no: 142 of 4th Instant I have
the honor to state as follows:-

2. There are 6 malnad -
villages in this state viz: Chandapur,
Nallakatti, Mukkeri, Kulikatti, Torun & Hotanbhalli
which are in need of a tolerably
food supply of quinine for free
distribution. The villages of Chandapur
and Hotanbhalli will ^{I think} each require
at least 2 pounds and the
remaining three villages, the
population of which is not so
large as that of the other two
villages will require one pound
each. One pound of quinine
will have to be kept in reserve
at all to meet a further demand
if any from any of the said
villages. Thus 8 pounds of quinine
will have to be ordered and kept
in the Dispensary every year -
at the end of May for free
distribution to the villages before

The setting in of the rains.

3. The Sub-Assistant Surgeon whom I consulted in the matter says that only ^{a quantity of} 10 to 12 pounds of quinine is supplied to his Dispensary every year from Govt Depot - which is barely sufficient to meet the yearly demand of the Dispensary & that any attempt to spare any out of this supply for use in Malnad villages is out of the question.

4. Therefore 8 pounds of quinine will have to be ordered. The price of quinine is Rs. 23-12-4 per pound. So provision for Rs. 200 will have to be made in the budget every year from the current year for 8 pounds of quinine for free distribution.

5. A new drug known as Quinoidine has been recently discovered. It can be obtained from The Alipor Juvenile Jail in two-grain and one-grain tablets at Rs. 4 per pound.

It is (as has been stated in the Indian Medical Gazette for September 1916 - page 337) as effective as quinine & causes no Cinchonism or gastric trouble.

This drug is said to be
exported sent by the Government
to every part of India. If an
amount of Rs: 40 only ~~was~~ is
spent every year, a sufficient
quantity of this drug can be
had for free distribution in
malarious villages of this state.

6. On hearing from you
as to which of the two drugs
(whether quinine or quinoidine)
should be ordered, further action
will be taken in the matter.

I have &c

OL

RBS
